IntelliTouch® Curve Touchscreen Solution

The Elo IntelliTouch® Curve touchscreen solution delivers full HD resolution and clear glass optical clarity using professional-grade components built for continuous use in public environments. The Elo curved touchscreen solution features patented IntelliTouch and IntelliTouch® Zero-Bezel surface acoustic wave (SAW) touch technology. The pure-glass construction and SAW touch technology delivers superior image clarity, resolution and light transmission ideal for HD and 4K graphics. The touchscreen will continue to work even if it gets scratched and there are no coatings, plastic films or moving parts to wear out. The active area of the touchscreen is resistant to chemicals such as acetone, toluene, methyl ethyl ketone, isopropyl alcohol, methyl alcohol, ethyl acetate, ammonia-based glass cleaners, gasoline, kerosene, and vinegar.

The Elo IntelliTouch Curve touchscreen is available with transactional single-touch or interactive dual-touch capabilities in 32-inch and 42-inch sizes.

Elo customization capabilities enable designers to include logos, clear icons, border buttons, and other enhancements. The stable, drift-free operation of SAW touchscreen technology provides an accurate touch response measured on three axes using a finger, gloved hand, or passive stylus. Elo’s sensitive touch response recognizes location and amount of pressure applied. Elo has tested IntelliTouch touchscreens to more than 50 million touches in one location without failure, using a stylus simulating or finger.

Applications
- Gaming machine
- Self-service terminal
- Interactive Digital Signage

Features
- Pure-glass construction for excellent image clarity, resolution, and light transmission
- Sleek, modern design supporting touchscreens that curve towards the user or wrap around columns
- Single or two-touch interface
- Available in 32” and 42” screen sizes
- Compatible with Microsoft Windows 8.1 and certified for Microsoft Windows 7
- Patented IntelliTouch surface acoustic wave (SAW) touch technology

Benefits
- Cost effective design
- No calibration – longer uptime
- Fast, accurate and stable touch performance
- No wear mechanism – minimize field repairs
- Custom options - Elo’s design team will customize standard solution for your application needs

About Elo
Elo founders pioneered the touchscreen over 40 years ago. Today, Elo Touch Solutions is a leading global supplier of touch-enabled technology, products and industry solutions. The Elo portfolio encompasses the broadest selection of OEM touchscreen components, touchmonitors, and all-in-one touchcomputers for the demanding requirements of diverse markets, including gaming machines, hospitality systems, industrial automation, interactive kiosks, healthcare, office equipment, point of sale terminals, retail displays, and transportation applications. The Elo touch experience has consistently stood for quality, reliability and innovation with over 20 million installations worldwide.
