Quick Installation Guide
Installing the Customer Display for the B-Series Touchcomputer

Caution:
The touch computer must be unplugged before any installation occurs.

Included Items:
• One Elo Customer Display
• Two mounting screws
1. Turn off the touch computer.

2. Install the customer display on top of the touch computer.

3. Remove the two accessory covers over the chosen mounting location.

4. To remove a cover, locate the two small cuts on the cover.

5. Press a small screwdriver into the cover between the two notches. As the cover bends up, grasp the end and peel it away.

6. Plug the cable into the connector on the touch computer.

7. Insert the hooks on the device into the corresponding slots on the touch computer.

8. Secure the device to the touch computer using the included screws.
