Our commitment. Your advantage.

1 Turn off the power to the touchcomputer.

**2** Remove the side door, as shown.
3 Remove the back door of the unit.

**4** Pivot the latches to unlock the door, then lift up on the tab to remove the door.

5 Add wireless module to top PCI connector.

6 Secure wireless card module with 2 screws.

7 Add antenna and secure with screws.

8 Route the antenna wire through the slot in the frame. Attach the wire to the primary connector on the wireless card.
