Why Add Interactive to Digital Signage?

Almost anywhere there is digital signage, adding an interactive component will deliver significant benefits. Your audience can now choose more content they want to learn about. Metrics can now report on messaging and content effectiveness by individual session. Cross-sell and up-sell promotions can be tested in real-time. When more potential customers can interact with your messaging, you can offer them more complete services.

Ruggedized Solutions for a Public Environment.

Elo Touch Solutions IDS touchmonitors are designed for use in public environments—to withstand extended hours, rigorous customer use and keep running for years. With the Elo Touch Solutions solution, you get a commercial grade, enterprise class solution backed by one of the industry leaders.
